Professional experience and Education

🎓 ELECTRONIC ENGINEERING
(September 2019 - in progress)

University Federico II

Major subjects: electronics, electromagnetic fields and circuits, electrical and electronic measurements, electrical engineering, automatic, IoT (Internet Of Things), telecommunications, information processing systems.

🍎 APPLE DEVELOPER ACADEMY PIER
(June 2023 - June 2024)

As Team Lead of the Pharos Team, I had the chance to collaborate on a project for the Solar Programme of the Barefoot college International NGO.
I acquired new skills about the management of a 6 years old project inherited by others teams. Experienced the SCRUM methodologies with my team, had given to me teh opportunity to acquire skills as Scrum Master too.

🍎 APPLE DEVELOPER ACADEMY STUDENT
(September 2022 - June 2023)

- SymphoNyx | Accessible game

  As Sound Designer I focused on how I could have a good UX without using the UI, but using only the interface sound and the sound that make people understand the environment in which they are

- Chapter Chase | 2D Platform game

  As Game Designer I focused on tools such as Midjourney AI, Adobe Photoshop and Unity. I especially focused on the the sprite editor and the skinning editor

- ARc | App (Education, Entertainment)

  As coder I studied the Swift frameworks of ARKit and RealityKit and I understand how I could bind a showed 3d model on the screen with a modal view.

🤖 Mentor at Cisco Academy DTLab
(April 2023 - September 2023)

As mentor I guide the students of the Cisco Academy DTLab during the process of learning. I provide them the tools necessary to understand the Devnet Course and then give them support during the phase of project work with an external society.

📕 CISCO NETWORKING ACADEMY - DTLab
(April 2022 - September 2022)

- BHProtection Project | Web Application - Webex Plugin

As project manager of AGS Group, I had to organise the tasks for all the team. I scheduled the meetings with our client, CSC (CloudSide Company). I managed the documentation, and analysed the marketing strategy of the product studying the risks and the benefits of the project.

📕 STMicroelettronics NeaPolisInnovation
(August 2021 - September 2021)

- Smart Locker Project | Application

The aim of the project is to use an operating system, ChibiOs, to manage the behaviour of a smart locker and create the locker itself with only a STMicroelettronics Nucleo 64 board, a servo motor, some leds and a display.

📕 High School for foreigns languages
(September 2014 - June 2019)

- Stages:
  - in 2018 at the "Escuela de Español: Costa de Valencia", Valencia(Spain);
  - in 2017 at the "Twin Group", London (UK);
  - in 2016 at the "ISLA: Quality Spanish Courses Spain", Salamanca (Spain).
- School-job experiences: teacher during " Les François pour tous!" project and as Travel Agent at Demarinis Viaggi.
